

INDEX TO VOLUME LV

- ADRENALECTOMY**, effect of, on total metabolism of cat, 293.
- Adrenalin, reversal of depressor action of, 450.
- Air, outdoor, report on daily analysis of, 294.
- ALTER, N. M. See MACY and ALTER, 304.
- American Physiological Society, Proceedings, 277.
- Anesthesia, effect of depth of, on heart, 462.
- Anoxemia, effects of, in decerebrate animals, 159.
- , lactic acid of blood in, 184.
- Artery under pneumatic compression, movements in, 84.
- AUB, J. C., J. FORMAN and E. M. BRIGHT. The effect of adrenalectomy upon the total metabolism of the cat, 293.
- BALDWIN**, F. M. Fatigue in frog muscle when immersed in various concentrations of lipoid-solvents; especially the higher alcohols, 284.
- BECHT, F. C. Studies on the changes in fluid volume under adrenalin, pituitrin, pilocarpine and atropine, 277.
- BEELER, C. See WILDER and BEELER, 287.
- BERCOVITZ, Z. and F. T. ROGERS. Contributions to the physiology of the stomach. LV. The influence of the vagi on gastric tonus and motility in the turtle, 323.
- — — — —. The inhibitory effects of vagus stimulation on gastric motility in the turtle, 310.
- BERGEIM, O. See HAWK, SMITH and BERGEIM, 339.
- Bioluminescence, physico-chemical studies on, 1.
- BLATZ, W. E. See HARTMAN and BLATZ, 284.
- Blood catalase, effects of temperatures on, 305.
- , lactic acid of, in anoxemia and shock, 184.
- pressure estimation by indirect methods, 84.
- sugar concentration, relationship of increase in, to specific dynamic action of glucose and of adrenalin, 293.
- — — of common frog, 355.
- — — of dog-fish and sand shark, 349.
- — — of normal pigeons, 362.
- BOOTHBY, W. M. and I. SANDIFORD. The relationship of the increase in blood sugar concentration to the specific dynamic action of glucose and to the specific dynamic action of adrenalin, 293.
- and K. SANDIFORD. Report on the daily analysis of outdoor air from November, 1919, to November, 1920, 294.
- and R. B. SANDIFORD. Nomo-graphic charts for metabolic rate determinations, 296.
- See PLUMMER and BOOTHBY, 295.
- Brain evolution, 65.
- Breathing, periodic, in decerebrate cats, 175.
- BRIGHT, E. M. See AUB, FORMAN and BRIGHT, 293.

- BURGE, W. E. and J. LEICHSENRING.
An explanation for the increased oxidation following the ingestion of fats, fatty acids and alcohols, 299.
———. An explanation for the increased oxidation after fertilization during youth, and for its decrease in old age, 302.
———. The effect of starvation on the catalase content, 301.
- C**APILLARY circulation in cat's ear, 315.
Cardiac and vasomotor reflexes induced by visceral stimulation in amphibia and reptilia, 31.
—— cycle, factors determining duration of consecutive phases of, 298.
Cardiovascular indices, examination of, 314.
CARLSON, A. J. and A. B. LUCKHARDT.
Studies on the visceral sensory nervous system:
V. Cardiac and vasomotor reflexes induced by visceral stimulation in amphibia and reptilia, 31.
VII. Skeletal reflexes induced by stimulation of visceral afferent nerves in the frog and the turtle, 366.
——. See LUCKHARDT and CARLSON, 13, 212.
Castration, influence of, on involution, 422.
Catalase content, effect of starvation on, 301.
CATTELL, MCK. See FORBES, COBB and CATTELL, 385.
Center of gravity in man, 312.
Cerebral hemispheres, relation of, to sympathetic nervous system, 310.
CHAMBERS, W. H. The changes in hydrogen-ion concentration coincident with the growth of *Bacterium tumefaciens* and other plant pathogens, 287.
Circulation, physiology of, 291.
Circulatory stasis, pathological physiology of, 298.
- COBB, S. See FORBES, COBB and CATTELL, 385.
COLLIP, J. B. Reversal of depressor action of small doses of adrenalin, 450.
Cotton seed meal and kernels, results of feeding, 304.
CRANE, M. M. See MARSHALL and CRANE, 278.
Cypridina hilgendorffii, physical and chemical nature of luciferase of, 1.
- D**AWSON, P. M. and co-workers.
Contributions to our knowledge of the center of gravity in man, 312.
—— and F. V. KUPPERMAN. An examination of certain cardiovascular indices, 314.
—— and E. O. OSTLUND. Heat block in nerves, 313.
—— and L. A. WALLRICH. Effect of spells of rest on physical efficiency, 314.
Decerebrate pigeon, relative heights of eating and drinking arcs in, 65.
Depressor action of adrenalin, reversal of, 450.
Diabetes, plasma chlorids and edema in, 287.
DUNLAP, K. Light-spot adaptation, 201.
Duodenal segment as standard reagent for study of tissue extracts, 404.
- E**LECTRICAL conductance and toxicity of electrolytes, 197.
Electrocardiogram and electromyogram in an elephant, 385.
Electrolytes, toxicity of, and electrical conductance, 197.
ERLANGER, J. Studies in blood pressure estimation by indirect methods. III. The movements in the artery under compression during blood pressure determinations, 84.
EYSTER, J. A. E. and W. J. MEEK. Further experimental removal of the sino-auricular node, 316.
